## **DETAILED ACTION**

### ***Allowable Subject Matter***

1. Claims 59-65, 67-78 and 80-83 are allowed.
2. The following is an examiner's statement of reasons for allowance:
3. The Applicant is correct in stating that the US patent application publication to Shih (US 2005/0086052) does not qualify as prior art against the present application under 35 USC 102(e), since it was filed after the effective filing date of the present application.
4. The Examiner has reviewed the Applicant's remarks and has deemed that, even if the filing date of Shih was proper for a 35 USC 102(e) rejection, the present claims would still be patentable over that which is disclosed in the reference. In addition, no other prior art references could be found that teach or fairly suggest that which is claimed in the present invention. The closest prior art found are the US patents to Massie et al. (5,698,807) and Ghias et al. (5,874,686), the US patent application publications to Khor et al. (US 2006/0289622), Shih (US 2005/0086052) and Finn et al. (US 2003/0023421), and those references cited in the Notice of References Cited, provided by the Examiner.
5. In terms of independent claims 59 and 72, the step of gradient based processing, to the identified voiced segments, for dividing each voiced segment into one or more notes has been identified as allowable subject matter. In the present invention, the

gradient based segmentation is employed to search for notes with voice portions, thus not relying so much on silence discrimination. The gradient based segmentation is derived from unique properties to extract note markers, where the selection of an advanced mode activates the gradient based segmentation (step 303), and the step is made up of the processes conducted in the gradient based segmentation unit (206 of Figure 2). Thus the process (303) searches for note markers within each voiced waveform. Therefore, independent claims 59 and 72, and their dependent claims 60-65, 67-71, 73-78 and 80-83, have been deemed allowable for the reasons stated above and for the gradient based segmentation, including the differentiation step (502) "to produce a gradient function".

6. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
